

Resilient Shorelines
for Rising Tides

ASBPA 2018 National Coastal Conference

CALL FOR ABSTRACTS — **Due May 4, 2018** —

The American Shore & Beach Preservation Association (ASBPA), in cooperation with the Coastal Zone Foundation, announces the Call for Abstracts for its 2018 National Coastal Conference, Oct. 30- Nov 2 at the Galveston Island Convention Center on Galveston Island, TX.

ASBPA is the nation's first organization to promote science-based policies for the preservation of coastal areas. The theme of the 2018 conference, "Resilient Shorelines for Rising Tides" continues to broaden our focus across the entire physical coastal and estuarine system. The National Coastal Conference provides an opportunity for coastal stakeholders and managers to develop collaborative networks to promote best management practices, while learning the latest science, engineering and policy needed to maintain and improve the health of our beach-front and estuarine shorelines and ecosystems.

In addition to our usual content of coastal science and engineering, policy and management, restoration and resilience, this year ASBPA's conference has a dedicated call for presentations on the day to day operations of public beaches and coastlines. We invite parks and recreation professionals who manage beaches and coastal areas and are responsible for their general upkeep, profitability, and community engagement to present on their successes and challenges. We hope that the scientific, engineering and restoration community can learn about the challenges of a managing a coastline after restoration or between nourishments, and coastal managers can learn more about the physical and biological processes that impact their coastline.

Technical, policy-oriented, and "operational" presentations or posters are invited for a broad range of coastal & estuarine ecology, science, engineering, economics, and policy. Specific topics include, but are not limited to:

- Design Concepts and Projects
 - Green/Grey Infrastructure and Living Shorelines
 - Regional Comprehensive Coastal Studies
 - Lessons Learned from tropical storms/hurricanes (Matthew, Harvey, Irma, Maria, etc.)
 - Coastal & Estuarine Landscape Architecture
 - Coastal & Estuarine Modeling
 - Coastal Hazard Mapping & Analysis Tools
 - Coastal & Estuarine Resiliency
 - Sea Level Guidance, Planning and Adaptive Management
 - Beach Restoration and Coastal Structures
 - Lagoon, Wetland, Marsh, and Estuary Restoration and Enhancement
 - Regional Sediment Management
 - Economics of Coastal Resources
 - Federal, State, and Local Coastal Policy, Regulatory and Legal Issues
 - Sand Source Rights
 - Coastal Infrastructure Management
-

Coastal Operations topics may include:

- Community Outreach and Education
-

- Day to Day Coastal Operations
- Managing the public (e.g., keeping people off dunes, pet issues, hazard warnings)
- Creating and managing revenue streams (e.g., parking, concessionaires, etc.)
- Marketing
- Waste/litter management
- Health and Safety (e.g., lifeguard issues, rip current, ADA accessibility)
- Access issues

Presentations may be PowerPoint or poster format. Abstracts (up to 500 words) are due by May 4, 2018. Submit abstracts via the online form at www.asbpa.org. Presenters are responsible for all of their expenses including travel, lodging, and registration fees. Notification of presentation status will occur by June 25, 2018. Additional information can be found at www.asbpa.org.
